Seven noble families fight for control of the mythical land of Westeros. Friction between the houses leads to full-scale war. All while a very ancient evil awakens in the farthest north. 3 Faces — cover art back in, actors shown rather than named

Circles are actor photos, hatched rectangles are posters. TMDb serves person photos as `profile_path` on each credit — real, but not in your data model yet, so it needs adding to the recommender output.

The GoT data forced a decision: **Westworld, your top recommendation, shares 12 people and not one is an actor** — composer, music supervisor, DP, sound. Peaky Blinders and Doctor Who are all cast. So each option below handles crew differently, and that's the main thing to judge.

3a Faces in the row — cast as photos, crew stays as a text line underneath
